TriVector SERVICES INC.

►Experience ►Performance ►Value

TriVector's leadership and experts bring decades of highly successful, hands-on application of systems and aerospace engineering fundamentals, and we provide a wide range of technical and engineering services to our customers. Through our experience, performance, and value, we solve critical Customer challenges and deliver superior technical solutions.

OUR CAPABILITIES

- Life Cycle Systems Engineering and Integration
  - Model-Based Systems Engineering (MBSE)
  - Requirements Definition and Management
  - Interface Requirements and Design Definition
  - Requirements Verification and Validation
  - Jira Project Integration
- Software Life Cycle Management
  - Software Development Planning and Management
  - Software Analysis, Safety and Airworthiness
- Specialized Engineering and Project Support
  - Project Initiation, Planning, Execution and Control
  - Integrated Avionics & Software Test
  - Guidance, Navigation and Control
  - Power and Electrical Integration, EMI/EMC
  - Thermal Analysis, Space Environments, Reliability
  - Missile Test Data Analysis and Reporting
  - Program Risk Assessment, Tracking, and Reporting
- Modeling and Simulation
  - Launch Vehicle and Subsystem Development
  - Command and Data Handling/Software Timing
  - Software Verification, Validation, and Accreditation
- Test Engineering, Operations, and Technician Support
  - Test Requirements, Planning, Procedures, and Execution
  - Development, Qualification, and Acceptance Testing
  - Weapons Systems and Live-Fire Test Operations
  - Range Instrumentation, Calibration, and Data Acquisition
  - Optical Tracking, High-Speed Imaging, Radar, and RF Support
  - Test Data Reduction, Analysis, and Visualization
  - Materials, Structural Dynamics, and Environmental Testing
  - Electrical Fabrication, Test, and Assembly
  - Range Mission Control and Test Operations Support
- Cybersecurity Engineering and Risk Management
  - Cybersecurity Requirements Verification and Documentation
  - Cyber Risk Assessment, Mitigation Planning, and Reporting
  - Cybersecurity Variance, Waiver, and Risk Acceptance Support
